

\$PEN Whitepaper – Community-Owned, Football-Driven, Utility-Backed

Notorious PEN | ERC-20 | Ethereum Mainnet
Total Supply: 6,900,000,000 \$PEN (fixed forever)

A movement born from memes. Built for impact. From the streets of São Paulo to the pitches of Lagos, from Jakarta backyards to Manchester estates, football is the universal language.

\$PEN turns that language into action. Every tap in the miner app doesn't just earn you tokens. It puts real footballs, boots, and jerseys in the hands of kids who have never owned proper gear — no matter where they play.

This is not charity. This is a self-sustaining circular economy that rewards you and changes childhoods at the same time.

Our Promise

We will never break the loop. We mine → We earn → We give → We grow → We repeat. Forever.

How the Loop Works

• You tap → earn \$PEN in the mobile miner (cloud-powered, zero battery drain) • Transaction fees + app revenue → automatic buy-backs • Portion of buy-backs → Frog Ball Fund → real gear shipped worldwide • Photos and live tracker → community feels the impact → more miners join • Demand grows → token value grows → more gear shipped → loop continues

Frog Ball Fund – 100% Transparent

• Public multisig wallet • Live dashboard: kids helped, money sent, photos, videos • Monthly independent audit (reports published) • Goal 2026: 10,000 children equipped across every continent that loves football
