DISCLAIMER

Yo, Pepe Crew! Captain Pepe and \$CAPE are ready to lead the Pepe Crew through the crypto multiverse, but even Earth's mightiest Avengers can't dodge every cosmic storm. This whitepaper is your SHIELD briefing, laying out the vision for Captain Pepe's Endgame – but it ain't a guarantee of moon-level gains. Investing in \$CAPE, like any memecoin, is a wild ride with high volatility. Prices can crash faster than a Quinjet in a Thanos ambush, and you could lose your entire stack – no cap, fam! Past performance? It's not a Vibranium crystal ball for future results.

The Captain Pepe team ain't financial advisors, and this whitepaper isn't financial advice. Do your own research before suiting up with \$CAPE. captainpepe.io, Pepe's Shield, Stark's Vault, and the Avengers' War Room are experimental tools built on Ethereum's blockchain. Tech glitches, network congestion, or market chaos could disrupt operations, and gas fees (in ETH gwei) flex with network hype. While \$CAPE's smart contract is audited by top-tier firms (details at captainpepe.io pre-presale), no system's 100% Thanos-proof against hacks or exploits.

Crypto's a legal jungle – regulations vary by galaxy, and some regions may restrict or ban \$CAPE trading or staking. Check your local laws before joining the Pepe Crew. The value of \$CAPE rides on market sentiment, community hype, and global economic shifts, none of which we control. By reading this, you agree that Captain Pepe, its team, and affiliates aren't liable for any losses, damages, or rug-pull-level disasters from your \$CAPE trades or actions. Assemble wisely, stack \$CAPE for the lulz, and fight for the moon – but know the battlefield's risks, Avengers!
